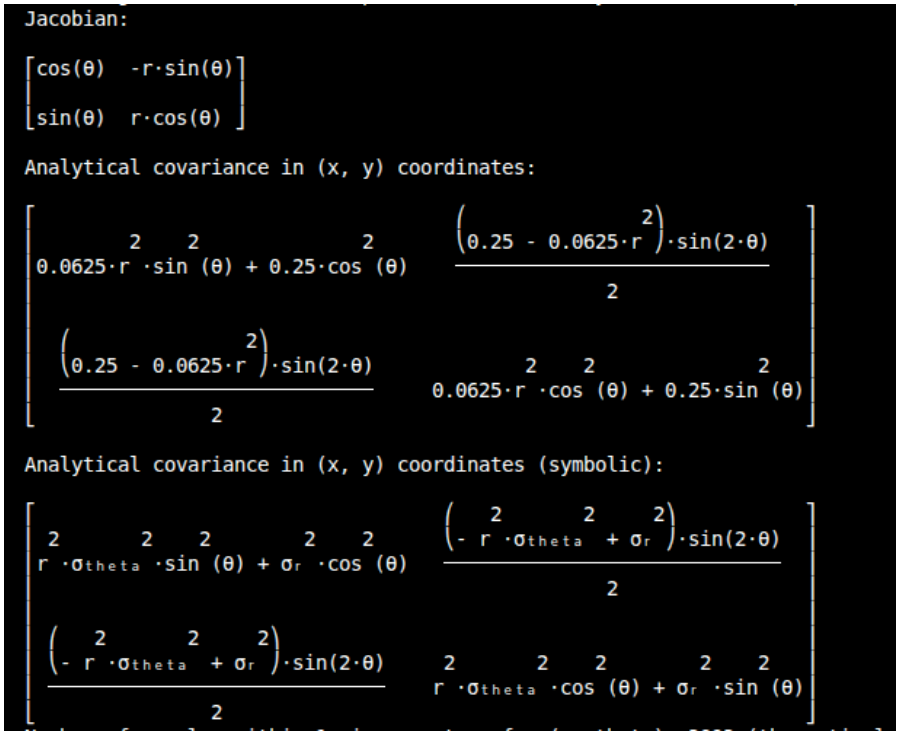
UP-Q0-6

Terminal Output:



Number of samples within 1-sigma contour for (r, theta): 3893 (theoretical: 3934.69)
Percentage of samples within 1-sigma contour for (r, theta): 38.93% (theoretical: 39.35%)
Number of samples within 2-sigma contour for (r, theta): 8616 (theoretical: 8646.65)
Percentage of samples within 2-sigma contour for (r, theta): 86.16% (theoretical: 86.47%)
Number of samples within 3-sigma contour for (r, theta): 9885 (theoretical: 9888.91)
Percentage of samples within 3-sigma contour for (r, theta): 98.85% (theoretical: 98.89%)
Number of samples within 1-sigma contour for (x, y): 3834 (theoretical: 3934.69)
Percentage of samples within 1-sigma contour for (x, y): 38.34% (theoretical: 39.35%)
Number of samples within 2-sigma contour for (x, y): 7952 (theoretical: 8646.65)
Percentage of samples within 2-sigma contour for (x, y): 79.52% (theoretical: 86.47%)
Number of samples within 3-sigma contour for (x, y): 9296 (theoretical: 9888.91)
Percentage of samples within 3-sigma contour for (x, y): 92.96% (theoretical: 98.89%)
